

OPERATIONAL HOURS

- Universal Time Coordinated (UTC) and the Gregorian calendar are used by air navigation services and publications issued by the Norwegian Aeronautical Information Service. Reporting of time is expressed to the nearest minute, e.g. 12:40:35 is reported as 1241.

Norwegian standard local time (winter time) is UTC + 1 hour. Norwegian daylight saving time is UTC + 2 hours.

Times in AIP Norway are published as UTC related to Norwegian standard time (winter time).

To obtain UTC time during the daylight saving period, one hour must be subtracted from UTC times published in AIP Norway.

Example:

0345 UTC (0445 local time) shall be read as 0245 UTC (0445 local time) during the daylight saving period.

The daylight saving period commences last Sunday in March at 0100 UTC (0200 local time) and ends last Sunday in October at 0100 UTC (0300 local time).

- Consult AIP Norway, AD 1.1 for details concerning extension of service availability and extra ordinary openings, including description of any surcharges.
- Changes since last revision are highlighted in yellow

Revised per AIRAC 18 MAY 2023
